MACH4 Label Printer

Made in Germany

Product type overview for MACH4

B with tear-off plate
A minimum label height of 30 mm is required for it to be torn off.

1.1	Printer	MACH4		
	Print resolution dpi	203	300	600
	Print width up to mm	104	105,6	105,6
	Print speed up to mm/s	200	200	100

P with tear-off plate and dispensing function
The label height on dispending is 20 – 200 mm.

1.2	Printer	MACH4		
	Print resolution dpi	203	300	600
	Print width up to mm	104	105,6	105,6
	Print speed up to mm/s	200	200	100

C with tear-off plate and cutter
Labels or continuous material can be cut at a height of just 12 mm.

1.3	Printer	MACH4		
	Print resolution dpi	203	300	600
	Print width up to mm	104	105,6	105,6
	Print speed up to mm/s	200	200	100

Option:

RFID read/write unit
The label printers can also be equipped with an RFID read/write unit for transponders in Smart labels with 13.56 MHz in line with ISO 15693.

Key features

- MACH4 offers all the features of a high class industrial printer with a wide application range.

- Labels and ribbons can be inserted from the front. The print mechanism and housing are made of premium materials and are perfectly harmonized in their form and function.

- Easy and comfortable handling and high reliability were the requirements during development. The large display with white backlight offers optimum readability.

- The navigation pad with the additional "Enter" button simplifies operation, with only the operated functions being displayed.

- The centered label path eliminates the need for adjustments and avoids wrinkling of the ribbon.

- The high-tech electronic board incorporates all the requisite interfaces as standard and works with all kinds of adapters.

Technical details
1 Cover with large window
Can be opened wide. The integrated cushioning mechanism ensures smooth closing. The label stock is visible at all times.

2 Media hub
The roll is inserted into the media hub and centered automatically. Materials of different widths fit easily within the box.

3 Ribbon retainer
The ribbon can be slid onto a ribbon supply hub with spring mounted brackets. It can be centered with a movable flange and a positioning indicator. The ribbon can be inserted quickly and easily into the print mechanism.

4 Print mechanism
It can be opened at the push of a button and offers easy access.

5 Printing with 203, 300 or 600 dpi
The printheads can switch easily between 203 and 300 dpi. The printer detects the resolution automatically.

6 Gap sensor
To detect the beginning or end of labels, the gap sensor is mounted in the center of the label path. With multi-track labels, the user can switch to another sensor that is shifted 10 mm sideways.

7 Label guide
The adjustment knob can be used to adjust the width of the printing area in order to center the labels.

8 Reflex sensor
The adjustable reflex sensor can be used to identify the start of a label, print marks and cut-outs

9 Drive roller
The drive roller can be easily removed for cleaning or replacement.

10 Peel-off plate
The liner is guided down behind the operation panel. The label is removed from its liner at the peel-off-plate.

Interfaces

Rear of printer

1 RS232C interface.

2 USB 2.0 slave interface.

3 Ethernet 10/100 Base T interface with TCP/IP.

4 Slot for wireless LAN card.

5 Two USB master interfaces for connecting an external operation panel, keyboard, scanner, USB flash drive or service key.

6 Slot for CompactFlash Type I memory card.

Options

- Centronics bi-directional interface acc. to IEEE 1284. RS422/RS485 interface 1,200 to 230,400 Baud/8 Bit. The interfaces are plugged into the PC. Connection to the printer via mini USB connection cable.

- Label selection – I/O box. Up to 16 different labels can be loaded via PLC from a memory card. Operation of four inputs/outputs via Basic Interpreter.

- cab WLAN card 802.11 b/g.

Stand-alone operation

Printing without PC

Stand-alone operation is the ability to print labels even if the printer is not connected to the host system.
The label layout is designed with the label software cablabel S3 or direct programming via PC.
Label formats, fonts, font-, text- and graphics data as well as data base contents are saved on the USB stick or read on the internal data memory IFFS.
Only variable data to be printed is sent to the printer via keyboard or scanner.

Technical data

Label printer			MACH4

Operating data					
Power supply			100 - 240 VAC 50/60 Hz, PFC		
Energy consumption			max. 300 W		
Temperature/Humidity	Operation:		+5–40°C / 10–85 %, not condensing		
	Stock:		+0–60°C / 20–80 %, not condensing		
	Transport:		-25–60°C / 20–80 %, not condensing		
Approvals			CE, FCC class A, CB, CCC, UL		

[1] Limitations may apply to small labels, thin materials or strong adhesives. Critical materials or applications must be tested and approved.
[2] The ribbon should be roughly the same width as the label in order to avoid folding.
[3] Reflective sensor with RFID not available.

Operation panel

Buttons/LED display	Pause, Feed, Cancel, Menu, Enter, 4 x Cursor
LCD graphic display	Width 60, Height 40 mm, Text 4 lines, approx. 20 characters per line

Settings

	Digital or analog clock	Time
	System settings	Date
	Print parameters	Interfaces
	25 language settings	Security

On the Display

	Data reception	Clock
	WLAN field intensity	Date sheet
	Ethernet status	abc Debug
	Used memory	Input buffer
	Temperature printhead	Remaining ribbon
	Access to memory card	

Monitoring

Stop printing if	End of ribbon
	End of labels
	Printhead open
	Final position not reached

Test routines

System diagnosis	When switched on, including printhead testing
Short status, status print	Font list, device list, WLAN Status, label profile, test grid, monitor mode, PPP status
Status reports	Status printout with information about settings, e.g. print length counter, runtime counter, etc. Request of status via software command. Status messages on the display, e.g. network error - no link, barcode error, etc.

Fonts

Font types	5 Bitmap fonts, incl. OCR-A, OCR-B and 3 Vector Fonts Swiss 721, Swiss 721 Bold and Monospace 821 internally available, loadable TrueType fonts. Thai and Chinese (simplified Chinese) available as option.
Character sets	Windows 1250 up to 1257, DOS 437, 737, 775, 850, 852, 857, 862, 864, 866, 869, EBC DIC 500, ISO 8859-1 up to -10 and -13 up to -16, WinOEM 720, UTF-8, Macintosh Roman, DEC MCS, KOI8-R. All West and East European Latin, Cyrillic, Greek, Hebrew and Arabic characters are supported. Thai and Chinese available as option.
Bitmap fonts	Size of width and height 1 – 3 mm Zoom 2 – 10 Orientation 0°, 90°, 180°, 270°
Vector- / TrueType fonts	Size of width and height 0,9 – 128 mm Variable zoom, Orientation 360° in steps of 1°
Font formats	Bold, Italic, underlined, outline, inverse, depending on character fonts
Font width	Variable

Graphics

Graphic elements	Line, arrow, box, circle, ellipse, filled and filled with fading
Graphic formats	PCX, IMG, BMP, TIF, MAC, GIF, PNG

Barcodes

Linear barcodes	Code 39, Code 93	Interleaved 2 / 5
	Code 39 Full ASCII	Ident- and lead code of
	Code 128 A, B, C	Deutsche Post AG
	EAN 8, 13	Codabar
	EAN / UCC 128	JAN 8, 13
	EAN / UPC Appendix 2	MSI
	EAN / UPC Appendix 5	Plessey
	FIM	Postnet
	HIBC	RSS 14
		UPC A, E, E0
2D codes	Aztec, Codablock F, Data Matrix, PDF 417, Micro PDF 417, UPS Maxicode, QR-Code, RSS 14 truncated, limited, stacked and stacked omnidirectional, EAN-Datamatrix, GS1 Data Bar	
	All codes are variable in height, module width and ratio. Orientation 0°, 90°, 180°, 270°. Optionally with check digit, printed characters and start/stop code depending on type of code.

4.1	**Connecting cable RS232 C** 9 / 9 pin, length 3 m
4.2	**Patch cableCAT 5e** 3 m grey

Operation and compliance with CE standards is only warranted by using materials provided or recommended by cab.

Label software cablabel® S3

NEW
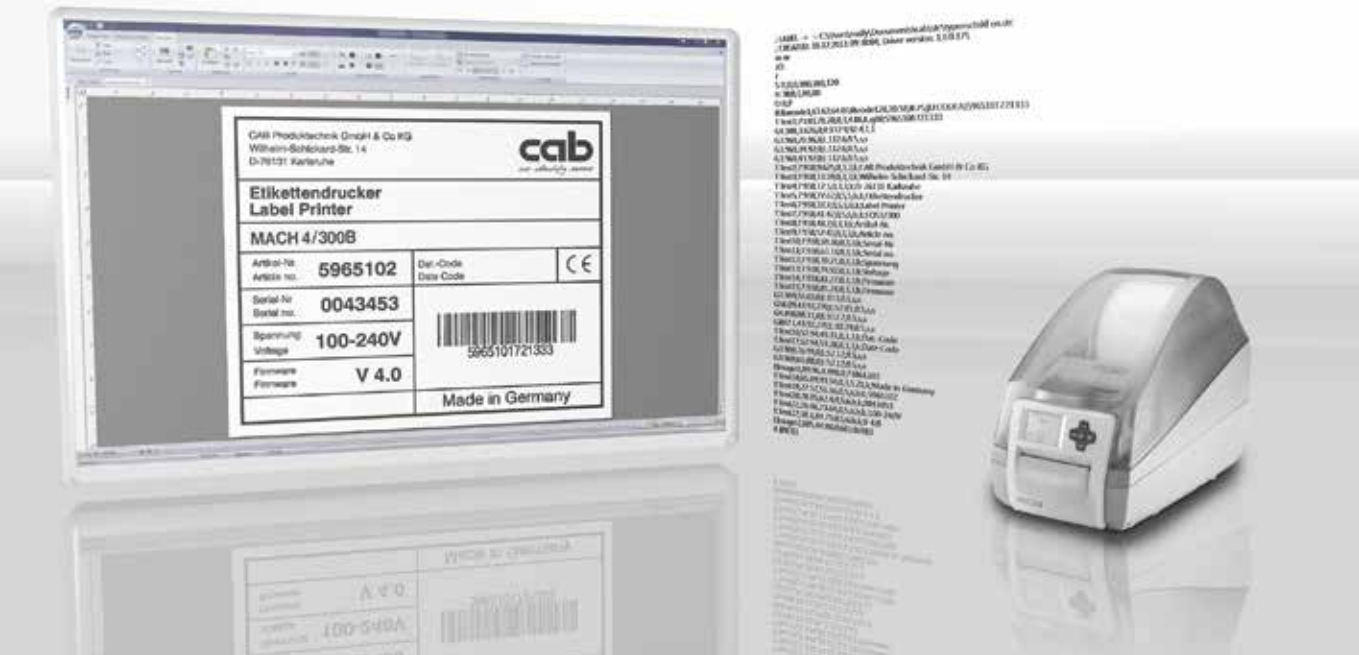

In cablabel® S3 cab concentrates label design, print control and monitoring of all cab marking systems and synchronizes the development of devices and software.

Highlights

cablabel® S3 opens full potential of cab devices like no other available software does: the software provides JScript instruction set to the full extend. The Pro product imports already existing JScript files, so you can switch over to the new software without wasting time. With the new layer technology the user designs a label with the data for all established devices and resolutions. The intelligent print control evaluates onto which device and with which resolution the label has to be printed and sends adequate data. This reduces possible sources of error.

Simultaneously cablabel® S3 maximizes the integration database connections via Database Connector. After designing, the software provides all files that are stored within the printer for data base connections. And, if you want your marking system to print independently from a host system in the stand alone mode, cablabel® S3 supports this in the same way. Additionally, the software creates interfaces that are easy to handle for the connection to SAP or other devices like SPC, scales or bar code tester.

Products

Companies structure label printing differently. For example, creation and production are executed by different employees. To adopt the software package to your company cab offers different products.

cablabel® S3 Lite is delivered free of costs with every cab printer and allows you to create and print labels.

With cost-saving cablabel® S3 Pro you create label designs for professional technical solutions.

cablabel® S3 Viewer shows the preview of a label in the Windows Explorer and is delivered free of costs with every cablabel® S3. The Viewer may support you for example in approval processes or supplier requirements.

cablabel® S3 Print is provided for users in production or warehousing. The user interface is simplified and makes only those functions available which are required for label printing.

Other products like cablabel® S3 Pro Laser, Print Laser und Print Server are in preparation.

Integration

No printer is isolated – in a productive environment it is connected to other equipment or networks for control and monitoring. cab offers various possibilities to integrate the printer into your environment.

Control

Every cab printer can be directly coded with the simple programming language *JScript* and an extensive instruction set. The label software cablabel® S3 supports optimally JScript, but a JScript program may also be created with any text editor.

As an integrated element of the firmware, the *abc Basic compiler* enables the printer to process data via BASIC programming before it is sent for print editing. That way, you replace external printer languages or integrate data from other systems, e.g. balance or a PLC.

11.4 In the stand-alone mode with additional network connection, the *Database Connector* enables printers to access data directly from a central ODBC-, OLEDB compatible database and to print it as a label.

In cooperation with SAP* cab developed the so-called *replace method* to control cab printers quickly and easily from SAPScript using SAP R/3. Using the replace method the host computer only sends the JScript variable, respectively changed data to the printer. As a Silver Level partner in SAP's Printer Vendor Program, cab has access to the SAP development area for optimum printer support in SAP environments.

*SAP and R/3 are registered trademarks of SAP AG.

11.10 The *Programmer's guide* explains and describes commands for different printer models via direct programming with JScript and abc and additionally the connection of the printer to databases via Database Connector.

For the printer control via PC accredited drivers are available for established Windows operating systems and additionally CUPS-based drivers for Mac OS X and Linux. The drivers ensure optimal stability on your operating system.
Monitoring

Using standard programs such as the web browser or FTP clients, the integrated HTTP and FTP server enables print monitoring, configuration, firmware updates and memory card administration. Status, warning and error messages are sent to administrators or users as e-mails or SNMP datagrams via SNMP and SMTP clients. A time server is used to synchronize time and date.

11.6 The cab Network Manager enables the user to control a number of printers across a network simultaneously. It supports monitoring, configuration, firmware updates, memory card administration, file synchronization and PIN administration centrally.
