The Best Companion for
Mobile Retailing and Hospitality

MT-4008W

Ergonomic and Versatile Mobile POS

MT-4008W is specifically created for both retail and hospitality segments. It is an 8" tablet that supports MSR attachment, and can be integrated with the choice of a detachable pistol grip or a hand strap depending on the application. Moreover, an optional dock station allows the device to have the features and functionality as an all-in-one POS.

Ergonomic Design

The detachable pistol grip (PG-200) for MT-4008W is a truly ingenious invention. It houses a 1D or 2D barcode scanner in the pistol grip shape handle, which is ergonomically designed to take the strain out of operator's hand and arm, and enabling the user to easily carry and handle the tablet. It smartly solves the cumbersome issue of larger mobile devices.

Extra Protection

Hand strap that comes with the hospitality package prevents the tablet from dropping on the ground accidentally and eases the use's fatigue during the hours of work.

Seamless Application Integration

Instead of the wide screen format found in the majority of the consumer tablets, MT-4008W comes with the POS industry standard 1024 x 768 resolution, which allows the existing POS applications to be ported over without any modification.

Long Hour Operation

MT-4008W is designed with advanced power saving technology that provides long battery life for daily operation. However, for retailers who require even longer battery life for more intensive usage, the pistol grip also houses a removable battery that can vastly extend the overall operating time.

Versatile Function

Another highlight of MT-4008W is the optional dock station, which has a 3" WIFI thermal POS receipt printer built-in, and connectivity options such as Serial ports, USB ports, LAN ports and QR ports. Once the tablet is integrated with its dock station, an all-in-one POS is instantly at your disposal. The MT-4008W offers more than just mobility but versatility.
